

## A message from our Medical Director...

I'm Dr. David Kent, a board certified E.N.T. Facial Plastic Surgeon. I developed the LifeStyle Lift™ so that men and women can look and feel younger without the trauma and downtime of extreme plastic surgery.

The LifeStyle Lift™ has kept that promise because virtually all who have had the procedure, some 5,000 to date, could go back to work the next day. I believe the reason we have such great results with the LifeStyle Lift™ is that we focus exclusively on this one procedure. So all of our physicians are experts at making you look younger with minimal bruising or long recovery times.

But the best part is that it's safer...safer because we use no harmful general anesthetics ever during the LifeStyle Lift™. So you're never asleep. Never at that risk. It's the complete opposite of extreme facial plastic surgery where you're put under dangerous anesthetics and often you don't look like yourself for months, even years. Done in about an hour the LifeStyle Lift™ has instant results. You can return to most activities the next day looking younger, more vibrant and youthful.

To sum up the LifeStyle Lift™, it's safer, easier and less expensive than the old way. When you come in for your private, confidential consultation we will show you newscasts from ABC, CBS, NBC and FOX News demonstrating the remarkable results of the LifeStyle Lift™. You will also see many before and after pictures and learn all about this amazing new procedure and what it can do for you.

We look forward to meeting with you and answering all of your questions. If you need anything at all please do not hesitate to contact one of our friendly staff.
